

Muhammad Ahmad

Full-Stack Developer

muhammadahmadma4642@gmail.com | Peshawar, Pakistan | github.com/M-Ahmad-ma

PROFESSIONAL SUMMARY

Full-Stack Developer with 2 years of hands-on experience building and shipping production-grade web and mobile applications. Proficient across the entire stack from React Native and Next.js frontends to Node.js and Laravel backends. Strong foundation in database design, REST API development, authentication systems, and browser automation. Passionate about clean architecture, type-safe code, and delivering real-world solutions.

EXPERIENCE

Full-Stack Developer — BitCoderLabs | 2 Years

Built and shipped full-stack applications across web and mobile using React, Next.js, React Native, Kotlin, and Node.js, delivering end-to-end features from database design to deployment.

- Designed and developed RESTful APIs for web and mobile clients
- Worked with relational databases including MySQL and PostgreSQL with schema design and query optimization
- Implemented authentication and authorization systems using JWT and role-based access control
- Built and deployed React Native mobile applications with geolocation and offline support
- Created real-time applications with live data synchronization

KEY PROJECTS

UI Blocks — Next.js 15, React 19, TypeScript, Tailwind CSS 4, Framer Motion, Three.js

shadcn/ui-inspired component library with 30+ reusable React components, a Next.js showcase app, and an npm-published CLI tool for copy-paste installation. Features Framer Motion animations, Tailwind CSS 4 theming, and Three.js 3D components.

MGCOT & DTE Android — React Native, TypeScript, Kotlin, Java, Android SDK, SQLite

Cross-platform teacher observation apps (React Native and native Android) for Punjab school monitoring. Features single and multi-grade assessment flows, geolocation check-in, timed observations, and multi-step submission processes connected to a Laravel backend API.

Hawia — React Native, TypeScript, React Navigation, TanStack Query, NativeWind

Rental delivery system for Saudi Arabia with company listings, item type/price browsing, interactive maps for nearby companies, WhatsApp order placement, and full i18n multi-language support for Arabic and English. Uses TanStack Query for data fetching and NativeWind for TailwindCSS-based styling.

curlie, Web Scraper & Crawler — Node.js, Puppeteer, Cheerio, Express, JSDOM

CLI tool mimicking curl with HTTP, FTP, and DNS-over-HTTPS support, plus multi-engine scraping platform with Puppeteer and Cheerio, and a web crawler for email extraction, lead generation, and data collection.

Books (Expo) — Expo, React Native, TypeScript, SQLite, TanStack Query

Cross-platform eBook reader app with local SQLite storage, reading list and wishlist management, and EPUB reader functionality. Built with Expo SDK 55 and TanStack Query for data management.

SKILLS

Frontend:

Backend:

Database:

Mobile & Tools:

React, Next.js, TypeScript,
Tailwind CSS, React
Native, Expo, Framer
Motion

Node.js, Express, Laravel,
PHP, REST API, JWT,
OAuth

MySQL, PostgreSQL,
SQLite

Kotlin, Java, Android SDK,
Git, Docker, Redis,
Puppeteer

EDUCATION

BS Computer Science (In Progress)
University of Peshawar

LANGUAGES

Urdu (Native), English (Professional)
